

ANIMAL NUTRITION

We are a trading company established in 2011 with the purpose of making the difference for all those who are directly or indirectly involved in the food and animal protein industry.

Since then, we have diversified our portfolio, expanded into new territories, and developed our supply to meet the demands of international markets.

Our specialized team provides with excellence all the necessary support for exporting meat, fish, meals and oils to all continents.

Ayamo's business culture is based in trust, relationship, love and commitment, always working with integrity and transparency in all our interactions.

sharing ACHIEVEMENTS

DIVISION

ANIMAL *nutrition*

Animal by-products plays a significant economic and environmental role in our society. 100% of the waste produced by the brazilian animal protein industry is recycled, ensuring the sustainability of the supply chain. The meals and fats obtained through this process are the mostly used ingredients in the animal feed manufacturing

With a diversified portfolio, Ayamo Global Foods serves the most demanding international markets, providing meals and fats with the highest standard of quality.
